DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/787,932, filed on March 21, 2001.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 08 November 2004 has been considered by the examiner.

Election/Restrictions

3. Applicant's reply to the restriction requirement of January 13, 2005 is acknowledged. Election was made without traverse in the reply filed on February 14, 2005.

Drawings

4. Figure 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

5. Claims 1-17 are allowed.

6. The following is an examiner's statement of reasons for allowance: The prior art does not teach the claimed motor terminal including, inter alia, an elongated second portion carried by a bent section, the elongated second portion extending away from the first portion to define a gap between first and second portions, and a curved contact portion carried by the second portion, the terminal arranged such that when force is applied to the contact portion in a direction towards the motor, the second portion moves elastically towards the first portion and the motor body (claims 1, 14 & 16); or a terminal with a holder that receives the motor body, the holder being configured so that the contact portion of the terminal is exposed through an opening in the holder, the holder further having registration surfaces that facilitate the freestanding placement of the motor between a first substrate surface and an opening second surface with the contact portion of the terminal in contact with an electrical contact on the first substrate surface to facilitate the electrical connection of the motor, whereby the motor may be installed and operated without requiring the motor assembly to be physically attached to any substrate structure (claim 7).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
